

DOUBLE WINDMILL

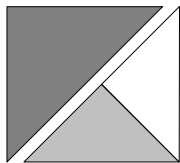

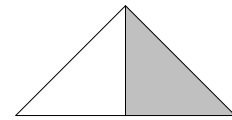

This block is constructed with a partial seam.

Use the templates or rotary cutting instructions to cut out your pieces.

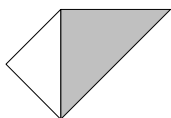

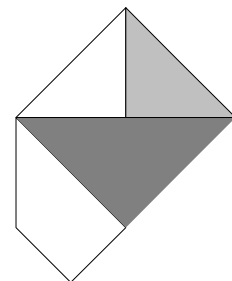

Piecing

Start by stitching the four star units. Stitch the medium and light triangles into pairs.

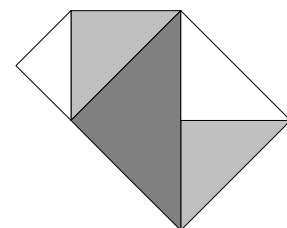

Stitch these to a dark triangle – don't confuse these with the corner triangles.

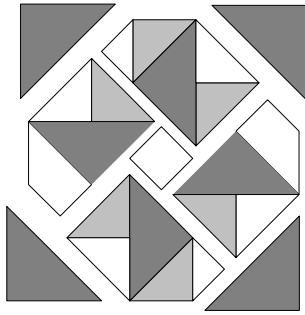

To two of these units stitch a light shape (rectangle with a corner missing).

For the other two – stitch a small light triangle to a medium triangle

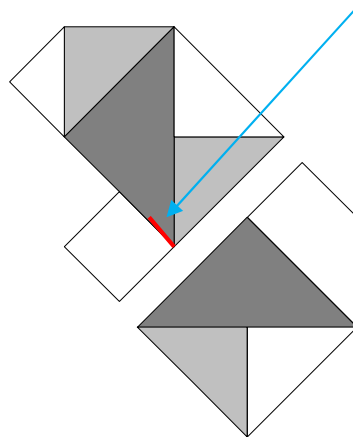

and stitch the medium triangle to the dark one as shown.

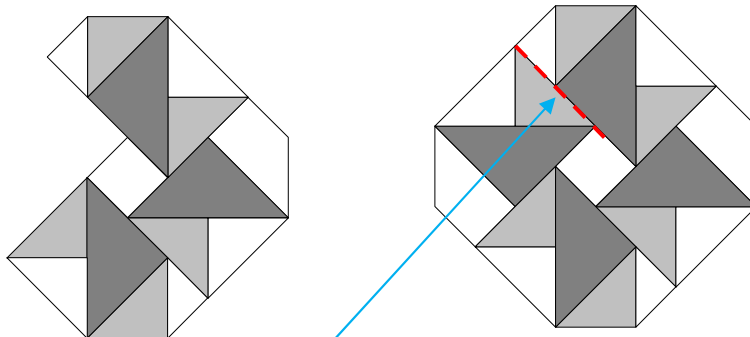

Lay all the units as shown.

Take one of the star units and stitch it – partially – to the centre square as shown.

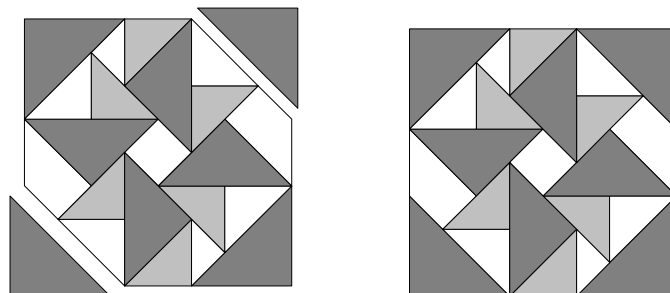

Take a different star unit and stitch it in place.

Stitch the third unit in place and then the fourth.

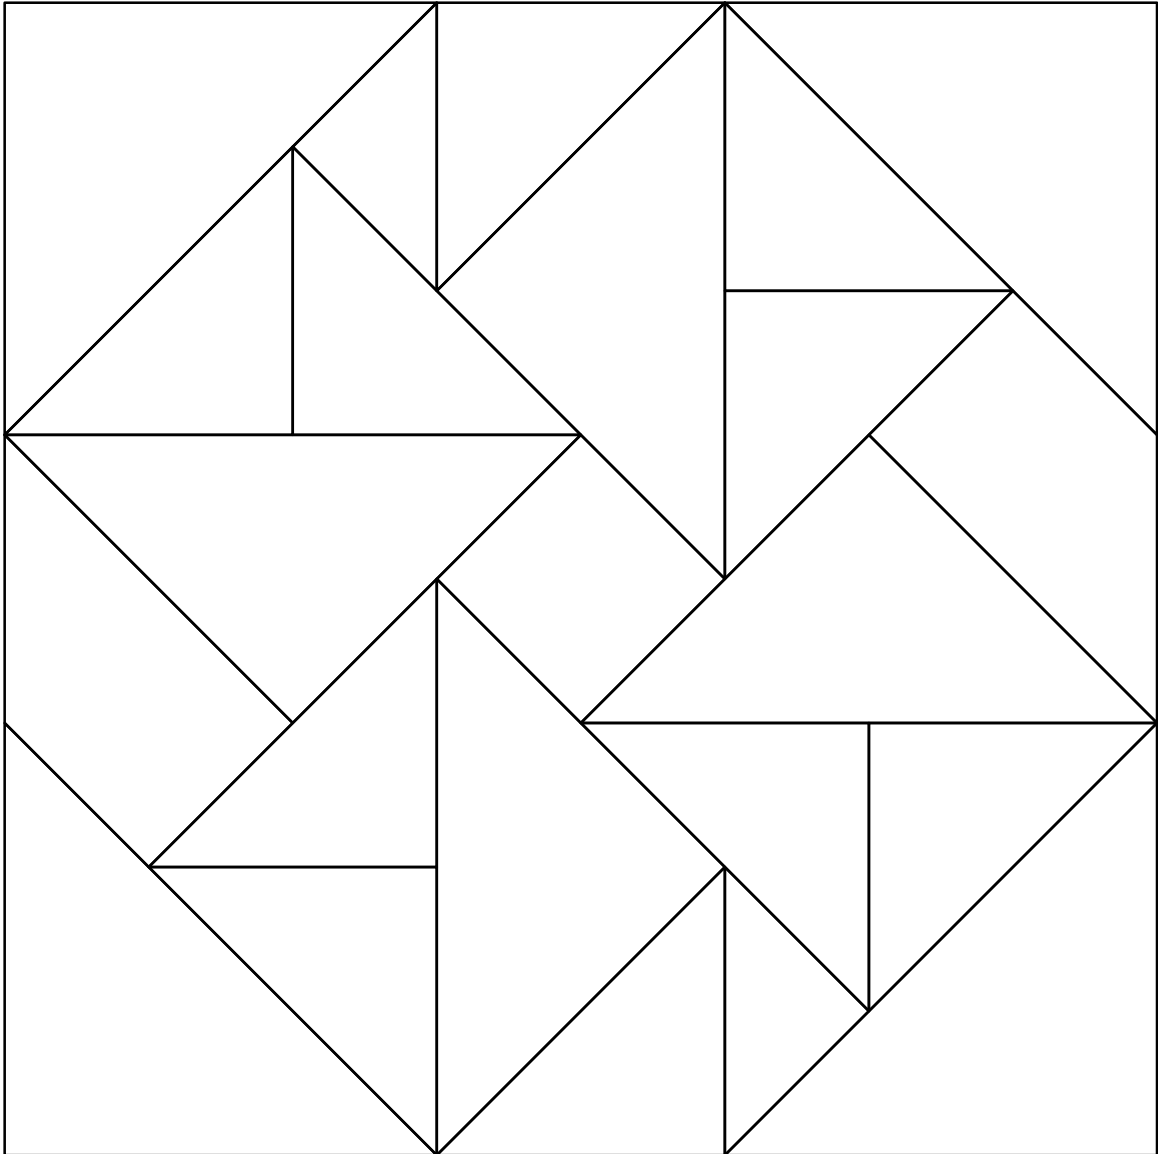

Finally complete the first seam.

Stitch the corner triangles in place to finish the block.
